

Model DA5L Wireless Display Case Sensor

Transmitter & Receiver

The Mr. Chime,[®]Inc. Model DA5L is a wireless display case sensor, that utilizes a magnetic reed switch to activate and sends a signal by the built-in RF transmitter, over 200' away to the remote receiver with two "selectable", volume controlled, pleasant electronic alerting sounds.

With addition of the unique accessories, "New" plug in reed switch contacts to be able to secure the display case with miniature contacts to reduce visibility of the security equipment. Also a cost saving feature, as now each opening can simply use an inexpensive, miniature sized open circuit reed switch instead of having to purchase a separate sensor transmitter for each opening. Now each opening (unlimited) can be wired in parallel using the plug in reed switch and then the wire run can simply be plugged into one miniature transmitter. Great cost savings !!!

Mr. Chime,[®] Inc. Patented micro technology provides "maximum" performance with "minimum" size & price.

FEATURES:

- ▲ "New" entry bypass mode (Optional) with selectable times of 30 seconds or one minute. This is accomplished with the use of a "NEW" wireless key fob Model DA5T, also available in this new plastic housing with a new sliding cover to protect the transmitter from accidental activations, if carried in a pocket. When the Model DA5T is activated, the bypass timer allows the display case to be opened without activating the alerting melody, therefore if the display case is secured prior to the timer duration, nothing will be activated.
- ▲ "New" automatic alerting if any door is not secured after bypass function mode. If the display case is opened without activating the bypass feature the alerting melody with immediately sound. Also, if the display case is not secured within the bypass timer setting, the alerting melody with immediately sound making sure each display case opening is secured. Also, the transmitter has two different alerting melodies, so one melody for display case bank "One" and another for display case bank "Two".
- ▲ No keys required, No keys to get lost. All electronic security simple to install and the best feature, "simple to operate", which is the most important, as it takes a team effort to fight the "five finger" crowd.
- ▲ The display case sensor (Model DA5LT) transmits a wireless signal to a remote receiver over 200 feet away, that emits a choice of two different volume controlled, pleasant electronic sounds. The **(Model DA5LTAC)** is available with its own AC power supply to eliminate battery replacement for high traffic business locations, for those that have 110v AC available near the entrance.
- ▲ The Model DA5LT (Sensor/transmitter), uses (1) 12v battery (not included) and has a Patented low battery consumption design making it the best available.
